

Omid Kianfar | Senior Front-End Developer

Phone: +989356593765 | **Email:** omid.kianfar.dev@gmail.com | **Location:** Tehran, Iran

GitHub: github.com/omidKianfar | **Linkedin:** linkedin.com/in/kianfar-omid1990/

Summary

Senior Front-End Developer with **6 years of experience**, specializing in building high-performance applications with **Next.js** and **TypeScript**. Proven track record of working **remotely on complex, large-scale projects for international markets, including the U.S. and Europe**. Expertise in owning end-to-end front-end architecture, with a strong focus on scalability, maintainability, and seamless third-party integrations. A highly reliable problem solver, recognized for resolving critical technical challenges in high-volume production environments and leading teams toward business-aligned success.

Technical Skills

- **Core:** TypeScript, JavaScript (ES6+), Next.js, React.js, Vue.js.
- **Architecture & Patterns:** System Design, Atomic Design, Clean Code.
- **State & Data Layer:** GraphQL, React Query, RESTful APIs, Redux Toolkit (RTK), Valtio.
- **UI/UX & Animation:** Tailwind CSS, MUI, Styled Components, Framer Motion, Lottie React.
- **Multimedia & Rich Text:** Slate.js, FFmpeg, Wave Surfer.
- **Backend, BaaS & Cloud:** Firebase (Firestore/Auth), Supabase, Laravel, MySQL, AWS, Azure.
- **Integrations & Forms:** Stripe, Socket.io/WebSocket, Google OAuth 2.0, Twilio, React Hook Form, Yup.
- **Quality, Tools & Methodologies:** Jest, React Testing Library, Git, Webpack, Jira, Agile/Scrum.

Professional Experiences

Front-End Developer | Apsy Company | Remote (Los Angeles, CA) Full-Time (3.5 Years)

- **Front-End Ownership:** Held sole responsibility for the front-end implementation of high-traffic web applications, independently managing architecture, feature development, and state management.
- **Performance Optimization:** Independently engineered performance enhancements by implementing manual code-splitting and lazy-loading, ensuring smooth interaction in data-heavy interfaces.
- **API Integration Strategy:** Demonstrated expertise in integrating complex API architectures; independently managed data fetching and synchronization using either GraphQL (for optimized, schema-based data retrieval) or RESTful APIs (for standard endpoint-based communication) based on project requirements.
- **Component Ecosystem & Scalability:** Developed a highly modular and reusable component ecosystem across multiple large-scale applications using MUI and Styled Components, which significantly reduced code duplication and accelerated feature development.
- **Technical Maintenance & Troubleshooting:** Acted as the primary point of contact for the front-end, independently resolving complex production bugs and optimizing component logic for long-term maintainability.

Tech Stack: React.js | Next.js | TypeScript | GraphQL | React Query | Redux Toolkit | Firebase | MUI | AWS | Azure

Front-End Developer | Ifuturesoftware Company | Remote (Dubai, UAE) Part-Time (4 Months)

- **Platform expansion:** Collaborated in an Agile/Scrum team of 3 to migrate a mobile-first social media application (Instagram-style) to a robust desktop version, ensuring feature parity and high performance.
- **UI Ownership:** Led the development of high-interaction landing pages and key product features, leveraging Next.js and Tailwind CSS to deliver pixel-perfect and responsive designs.
- **API & State Integration:** Integrated complex product flows using GraphQL and React Query, ensuring seamless data synchronization and optimized user experience.
- **Quality & Stability:** Focused on Web Performance Optimization and Clean Code principles to maintain a high-quality codebase, while actively resolving production bugs within Jira-managed sprints.

Tech Stack: Next.js | TypeScript | GraphQL | React Query | Firebase | Tailwind CSS | Git | Jira

Full-Stack Web Developer | Freelance | Remote (Tehran, Iran) 1.5 Years

- **End-To-End Delivery:** Managed the complete lifecycle of web applications, translating business requirements into scalable solutions using React.js, Vue.js, and Laravel.
- **Architecture & Logic:** Architected robust database schemas using MySQL and implemented complex back-end logic, ensuring data integrity and application efficiency.
- **Code Quality:** Applied Clean Code principles and TypeScript (in later projects) to ensure long-term maintainability and performance of the codebase.
- **Client collaboration:** Successfully delivered custom-built solutions for various clients, ensuring high responsiveness and a user-centric design approach.

Tech Stack: React.js | Vue.js | TypeScript | JavaScript (ES6+) | Laravel | MySQL | Clean Code

Personal Projects (Technical Showcases)

Mini-Jira | Enterprise Project Management SaaS

Live-Demo-Link: next-mini-jira.netlify.app | **Github-Link:** github.com/omidKianfar/next-mini-jira

- **Architecture:** Engineered a scalable SaaS using Next.js 16 (App Router) and Atomic Design for modular, maintainable code.
- **Media Pipeline:** Built a custom in-browser video compression (FFmpeg) and image optimization pipeline, offloading heavy processing from the backend.
- **Collaboration:** Implemented real-time synchronization (Firebase) and robust Role-Based Access Control (RBAC) via Supabase RLS.
- **UI/UX:** Developed a high-fidelity Kanban engine (@dnd-kit) and custom rich-text editor (Slate.js) for an optimized experience.

Google Calendar Task Manager | SaaS

Github-Link: github.com/omidKianfar/next-google-calendar-app

- **Authentication:** Engineered secure Google OAuth 2.0 flow for calendar data access.

- **Scheduling Engine:** Built a high-performance interface using FullCalendar and Day.js for complex date manipulations.
- **Performance:** Optimized heavy calendar components via Suspense, Lazy-loading, and modular Atomic Design.

Select Companies Projects

Infuuse | B2B Business Automation SaaS (Enterprise Communication Platform)

- **Scalability:** Led front-end development for a multi-tenant platform using Next.js and GraphQL; built a modular UI system (Atomic Design).
- **Security & Integration:** Architected a hierarchical route protection system and real-time communication modules (Twilio, Google OAuth).
- **Data Handling:** Managed high-frequency data updates with React Query/Valtio and complex form validation (RHF/Yup).
- **Productivity:** Integrated custom Slate.js editor and media pipelines for enhanced user workflows.
- **Confidentiality Notice:** Due to strict NDA agreements, specific business logic and proprietary architectural details are intentionally omitted.

Octobit | Enterprise EdTech Scenario & Assessment SaaS

- **Dynamic Engine:** Led architecture for a rule-based branching engine, enabling infinite user paths based on dynamic assessment metrics.
- **Visual Editor:** Engineered an interaction-heavy Node-Graph Editor (React Flow) for visual scenario configuration with automated integrity checks.
- **Biometric & State:** Integrated AWS Amplify for real-time audio stress analysis and orchestrated deep state dependencies for multi-role dashboards (Valtio/Redux Toolkit).
- **Enterprise Features:** Built a multi-tenant billing system (Stripe) and real-time notification infrastructure via WebSockets.
- **Technical Compliance:** Specific project architecture, proprietary conversational logic, and client-side implementation details are protected under NDA.

Education Bachelor's degree in Software Engineering.
